

Jagwear

GYMNASTIC APPAREL

Optimum Care Instructions

**IMPORTANT for body suits, tracksuits, singlets or any other article
produced by Jagwear of Canada**

Step 1: Hand wash or machine wash inside out in a large volume of cold water on a gentle cycle. If in a sink, have the water running.

**DO NOT SOAK OR LEAVE IN THE WATER
EVEN FOR A MINUTE**

Step 2: Use a tiny amount of mild liquid detergent (zero).

Step 3: Remove clothing from the water immediately, and squeeze out as much water as possible, but do not wring as this can cause wear and disturb or remove the holographic coating or the rhinestone embellishments.

Step 4: Roll clothing in a clean dry towel to remove excess water, then hang to dry on a wide hanger. (ensure the front and back of the article is not stuck together from wetness). Wetness can cause colour transfer.

**Jagwear can not be responsible for normal wear and tear of any clothing. Jagwear cannot be responsible for colour transfer as sweat can cause colours to transfer (especially when a fabric is paired with white or other light colours. Jagwear does not know the washing practises of our customers.)*

Normal Wear and Tear Includes: Fading of colours, metallic coatings coming off, bleeding, or running of colours from washing or sweating. Snags in the fabric
